

## We accelerate compliant digital investment flows into the most talented teams and impactful technologies enabling the growth of global smart sustainable cities ecosystem.

Evercity carefully selects the best blockchain, IoT, Artificial Intelligence, cleantech, biotech projects in alignment with UN Sustainable Development Goals. We help them to attract further investments and deployment in smart cities, with a focus on Asia-Pacific region and the US.

Evercity team has deep knowledge and expertise in development, legal, marketing, digital finance markets and VC. We develop strategic partnerships with international organisations, investors, governments and top research centres to build a global smart sustainable cities ecosystem.

### WHY PARTNER WITH EVERCITY?

# 1

#### Talent sourcing

Get access to cutting-edge Industry 4.0 teams and ideas

# 2

#### Professional VC due-diligence

Receive due-diligence reports on financial, legal, tech status

# 3

#### Digital cross-border investments

Compliant cross-border crypto & fiat investments

### KEY PARTNERS

United 4 Smart Sustainable Cities

Russian carbon fund

International next generation payment service provider

VTB Environment

Moscow Institute of Physics and Technology

## EVERCITY PORTFOLIO PROJECTS

We carefully select the most promising tech projects with strong teams, reliable market reputation and proven track record on early development stages.

### AIRA

Economic blockchain protocol for machine-to-machine payments, robot-as-a-service, smart factories, autonomous sensor networks and fully automated supply chain.

**Project status:** scaling, mainnet launched

**Invested:** \$ 1 000 000

**Current round:** \$ 10 000 000

### DAO IPCI

Public blockchain ecosystem for the green finance markets, environmental assets, rights and liabilities. Pioneers of the world's first carbon credit transactions in blockchain.

**Project status:** scaling, operating in several countries

**Invested:** \$ 200 000

**Current round:** \$ 1 500 000

### SECURITY TOKEN ACCELERATOR

End-to-end platform for compliant issuance and investment in tokenized assets of smart sustainable city innovations with a multi-layer investor protection (stable coin, advanced reporting system, DAICO model).

**Project status:** MVP issuance in December, active pipeline building

**Invested:** \$ 800 000

**Current round:** \$ 3 200 000

### SYMMETRA

Revolutionary IoT cloud platform for «smart city as a service» and Big Data analytics. The technology connects various manufacturing and infrastructural systems, devices and sensors into a cloud service and allows to manage them in real time.

**Project status:** scaling, projects in Russia, the United Arab Emirates, Kazakhstan

**Invested/Current round:** \$5 000 000 equity investment

### AEROSTATE

Artificial intelligence-powered platform for air quality monitoring, detection of major pollution sources and the most affected urban areas. Key opportunities include design options for air quality improvement activities.

**Project status:** scaling, over 20 successful use-cases all over the world

**Invested:** \$ 500 000

**Current round:** \$ 2 000 000

### DRONE EMPLOYEE

Blockchain-based mobile robotics solutions for aerial filming, security monitoring and drone delivery via autonomous drones.

**Project status:** validating, first sales

**Invested:** \$ 400 000

**Current round:** \$ 2 000 000
